Let's Start!

Let's talk about it administrators!

Learning Outcome:

Identify key information about people's jobs and places of work in spoken or written contexts.

Identify key information about people's jobs and places of work in spoken or written contexts.

Ask your partner:

- Why are network and database administrators essential in a company?
- Where do you store all your information? Is it safe?

Can Do Statements:

- I can talk about duties and responsibilities related to job positions in IT.
- I can interpret information related to networks and databases.
- I can describe important facts related to networks and databases.

Let's Explore!

Hey, what's your IT* specialization?
*"IT" stands for Information Technology.

Instructions: Read the text below.

- Kathleen:** Hey, how's it going?
Kyle: Hi, pretty good, thanks. And you?
Kathleen: Great! I suppose you are the new co-worker.
Kyle: Yes, I am.
Kathleen: I'm Kathleen. Welcome to the company; I work as a network administrator.
Kyle: Thank you. My name is Kyle. I'm the new database administrator.
Kathleen: Terrific! Can you tell me your main duties here?
Kyle: Sure! I have to plan and develop databases. Likewise, I'm in charge of the security of databases. I set up and test storage in computer systems. I design recovery and backup computer programs, and I solve any problem that front-end users may find. What about you? Can you tell me about your main responsibilities?
Kathleen: I'm specialized in analyzing network fulfillment. I install enhancements. I should protect networks by creating access codes. I evaluate the throughput and the latency periods in networks according to the established workflow and policies.
Kyle: Wow! You must be very skilled. Could you give me more information about it?
Kathleen: Of course!
Kyle: Have you got any special training for this?
Kathleen: Yes, I have. I must read IT publications and attend networking conferences. Do you have the same training?
Kyle: Kind of. I also have to write data standards and work with multimedia programmers. Have you got any other tasks?
Kathleen: Yes, I have. I must find troubleshooting strategies, and I also have to provide support.
Kyle: In my case, I have got to be in contact with technical and operational staff to monitor performance.
Kathleen: I think database administration is awesome, but it can be a little complex. Do you have enough experience in databases?
Kyle: Yes, I do. I have a lot of experience in this field; in fact, I consider myself to be very professional.

Let's Practice!

Kathleen is asking Kyle some questions about responsibilities in IT jobs.

Instructions: Match the sentences from Column A with Column B.

COLUMN A

1. What do you have to do as a database administrator?
2. Have you got to protect the databases as a network administrator?
3. Why do you have to create recovery computer programs as a database administrator?

COLUMN B

- a. Because I have to recover lost information from the database.
- b. I have to design and work on databases.
- c. No, I haven't. I have got to secure computer networks through access codes.

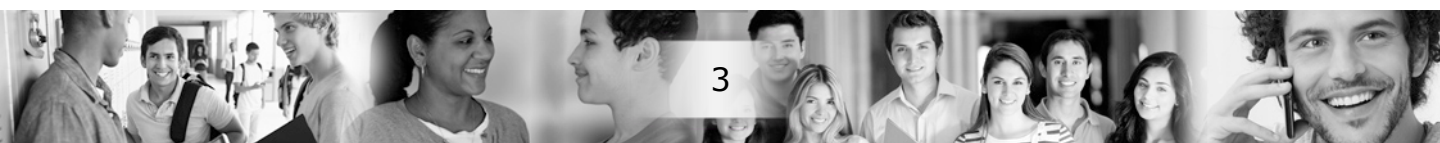

Let's Practice!

Kathleen and Kyle describe important facts!

Instructions: Select the correct answer.

1. Is Kyle the new database administrator?
 - a. Yes, he does.
 - b. No, he does.
 - c. Yes, he is.
 - d. No, he doesn't.
2. Does Kyle have to provide network support?
 - a. Yes, he have to provide network support.
 - b. Yes, he has to provide network support.
 - c. No, doesn't have to provide network support.
 - d. No, doesn't have to code software.
3. What does Kathleen have to install?
 - a. Yes, she does.
 - b. She has to install Windows.
 - c. She provides network support.
 - d. She has to install enhancements.
4. Has Kathleen got any special training?
 - a. Yes, she has.
 - b. Yes, she does.
 - c. Yes, she hasn't.
 - d. Yes, she got.
5. What experience has Kyle got?
 - a. He has got teaching experience.
 - b. He has got database experience.
 - c. He have got coding experience.
 - d. He has got managing experience.

Extension Activity

Network and Database Administrators in your community.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Research about networks and databases.
- Write a letter addressed to a company in your community where you explain the importance of these two administrators.
- Share with a partner.

Self-Assessment

Yes

No

- I research about networks and databases. ☐ ☐
- I create a letter addressed to a company in my community where I explain the importance of these two administrators. ☐ ☐
- I share with a partner. ☐ ☐

Target Words

- **latency** (noun): a period which has no activity
e.g. I evaluate the throughput and the latency periods in networks according to the established workflow and policies.
- **skilled** (adjective): someone skillful or competent
e.g. Wow! You must be very skilled.
- **troubleshooting** (noun): detecting and solving a problem
e.g. I must find troubleshooting strategies, and I also have to provide support.
- **set up** (phrasal verb): to install
e.g. I set up and test storage in computer systems.
- **recovery** (noun): the act of reestablish something
e.g. I design recovery and backup computer programs, and I solve any problem that front-end users may find.
- **front-end** (noun): interface of a web site that can be seen for users
e.g. I design recovery and backup computer programs, and I solve any problem that front-end users may find.

Learning Points

Have You Got? And, Do You Have?

You use both **Have you got** and **Do you have** structures to ask about possession. The difference is that **Have you got** is more informal than **Do you have**.

Do you have?

This interrogative structure is based on the simple present tense. That's why you use the auxiliary verbs Do/Does depending on the person you are talking about. This structure is the most commonly used in the United States, while **have you got** is the most commonly used in the United Kingdom in informal contexts.

You can answer to these questions by using the auxiliary verb instead of using the whole complement; it's commonly known as a short answer.

Structure:

Do/Does + subject + **have** + complement + ?

Example:

Do you have a laptop?

Long answers:

Yes, I **have** a laptop.

No, I **don't** have a laptop

Short answers:

Yes, I **do**.

No, I **don't**.

Have you got?

This interrogative structure use the verb **Have** as an auxiliary and the verb **Got** with a present connotation.

Have/Has + subject + **got** + complement + ?

Example:

Have you got a laptop?

Yes, I **have**.

No, I **haven't**.

Learning Points

Look at the examples in the table:

DO YOU HAVE?	HAVE YOU GOT?
Do they have a database administrator? Yes, they do. No, they don't.	Have they got a database administrator? Yes, they have. No, they haven't.
Does Christina have a new IT position? Yes, she does. No, she doesn't.	Has Christina got a new IT position? Yes, she has. No, she hasn't.

Examples

- *Do you have the same training?*
- *Do you have enough experience in databases?*
- *Have you got any special training for this?*
- *Have you got other tasks?*

Collocations Related to Computers

Collocations are some specific words that need to be together because they form the appropriate and natural expressions in natural English.

It is very important for English learners to know collocations; the usage of wrong words could foment a misunderstanding.

In the following chart you can check some common collocations related to computers:

COMPUTER + NOUN	VERB + COMPUTER
Computer network	Run a/the computer
Computer program	Use a/the computer
Computer system	Switch on the computer
Computer equipment	Switch off the computer
Computer hardware	Log onto a/the computer
Computer software	Boot up the computer

Examples

- *I set up and test storage in computer systems.*
- *I design recovery and back-up computer programs.*
