Let's Start!

Do you want to be an application developer?

Learning Outcome:

Identify key information about people's jobs and places of work in spoken or written contexts.

Identify key information about people's jobs and places of work in spoken or written contexts.

Ask your partner:

- Which phone apps do you use the most? Why?
- Do you know how to create an app? Explain.

Can Do Statements:

- I can talk about duties and responsibilities related to job positions in IT.
- I can ask questions related to App development.
- I can give information related to application development.

Let's Explore!

Lucy loves her job as an application developer!

Instructions: Read the text below.

Bob: So, Lucy, tell me about your job.

Lucy: Well, I work as an application developer in a technology computers company.

Bob: What duties and responsibilities do you have to fulfill?

Lucy: I have to adapt software programs into useful applications for business and daily life convenience. I join all the elements of these software programs; then, I establish the program modification I want. Next, I continue with the installing process. And finally, I make a detailed testing of the application.

Bob: Why are you working in this field?

Lucy: I think I'm very creative and gifted for this job. Well, even though I haven't got a lot of experience, I consider I'm doing well. And, moreover I agree with Steve Jobs when he said that "Computers themselves, and software yet to be developed, will revolutionize the way we learn".

Bob: Wow! What do you have to do in a normal day?

Lucy: I generally modify programs according to new requirements, and I also evaluate their effectiveness. I have got a great and professional work team, so I haven't got to make decisions alone since they are very experienced.

Bob: What are you creating now?

Lucy: I'm developing a data-set to analyze the output of a program.

Bob: Is there enough work in application development?

Lucy: In fact, I have got a wide field of application. I have got the possibility to work in the mobile phone industry, graphic software, accounting programs, and office suits.

Bob: I see. I suppose that you need to be updated with everything related to application development.

Lucy: Exactly! I have to read, study, and keep up to date with each new software or App version. I need to consult manuals and technical reports to anticipate future problems and devise a solution as soon as possible.

Let's Practice!

Lucy is talking about apps developer duties!

Instructions: Read the sentence. Fill in the missing letters to complete the mystery word.

1. The p _ _ _ a _ _ r has got to join all the elements of software programs.
2. I have got to select and _ n _ _ ll the right turbo.

e.g. I work as an application developer in a technology computers company.
- **field** (noun): a particular area to perform an activity
e.g. Why are you working in this field?
- **gifted** (adjective): someone skillful at doing something
e.g. I think I'm very creative and gifted for this job.

Learning Points

Have Got in Affirmative and Negative.

You use have got to express possession or obligation.

Have got has the same meaning as the verb to have. However, we use **have got** when we want to be more formal.

Affirmative form

To make affirmative statements you must follow this structure:

Subject + **have / has got** + complement.

Examples:

*I **have got** a lot of experience in App development.*

*Tom **has got** some problems with that program.*

Pay attention to the conjugation of the verb to have in third persons singular.

Negative form

To make negative statements you must follow this structure:

Subject + **have / has + not + got** + Complement

Examples:

*I **haven't got** a lot of experience in App development.*

*Tom **hasn't got** any problem with that program.*

Notice that we generally contract the verb **have** with the particle not (haven't / hasn't). Let's take a look at the following chart to understand the conjugation of **have got**.

HAVE TO			
Subject	Conjugation	Affirmative Contraction	Negative Contraction
I	have got	I've got	I haven't got
You	have got	You've got	You haven't got
He/ she/ It	has got	He's got	He hasn't got
We	have got	We've got	We haven't got
They	have got	They've got	They haven't got

Learning Points

Examples

- *I have got a wide field of application.*
- *I have got the possibility to work in mobile phone industry, graphic programs, accounting software and office suits.*
- *I haven't got to make decisions alone since they are very experienced.*

Quotes About Computers.

Technology is everywhere since it simplifies many aspects of the daily life, such as education, business and entertainment. That's why many important intellectuals from different fields state interesting opinions about the influence of technology.

Read the following quotes, what do you think about them? Do you agree with them? Why?

The internet could be a very positive step towards education, organization and participation in a meaningful society.

Noam Chomsky

Computers themselves, and software yet to be developed, will revolutionize the way we learn.

Steve Jobs

Example

- *I agree with Steve Jobs when he said that "Computers themselves, and software yet to be developed, will revolutionize the way we learn".*
